Vaccine-Injured explains to the Grand Jury the Constant, unbearable pain now suffered due to the Pfizer Injection

By [Rhoda Wilson](#) on [March 12, 2022](#)

Terrance Munsamy is a 40-year-old South African who has suffered severe shingles from a first dose of the Pfizer Covid injection. It is a heart-breaking story of pain, loss of arm function and permanent scarring.

“I don’t sleep at night... This unbearable pain and this disfigurement of my arm... I don’t think I’ll be the same person again,” he said.

Munsamy had the Pfizer injection on 1 December 2021 and ever since has been in constant pain. He also has lost his job due to long periods of absenteeism resulting from his vaccine-injuries.

Grand Jury Day 4: Terrance Munsamy Testimony, 19 February 2022 (3 mins)

Since last year, [Transformative Health Justice](#) has been collecting data on Covid injection injuries in South Africa on an independent, voluntary, public interest vaccine effects reporting system, [SAVAERS](#). South Africans can report an adverse reaction to the SAVAERS website [HERE](#).

South Africans who have suffered an adverse effect post-injection can also make a report to the [South African Health Products Regulatory Authority \(“SAHPRA”\)](#). As of 25 February, 5354 adverse events had been reported to SAHPRA.
